

LEARN MORE ABOUT DONATING BLOOD STEM CELLS

Jason,
searching
patient

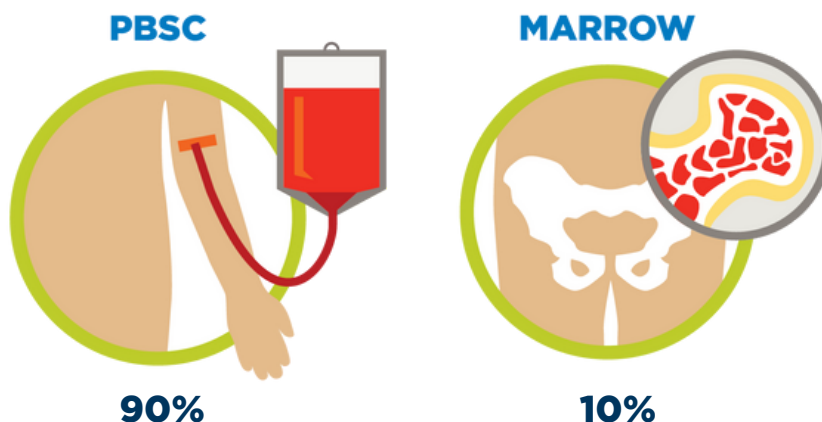

We cover 100% of donor expenses:

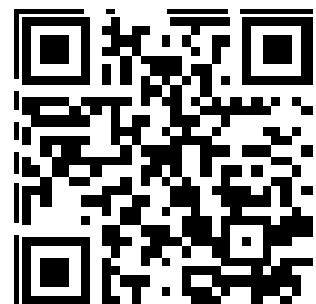

There are two ways to donate blood stem cells:

90% of donors are asked to provide blood stem cells collected from circulating blood. This is an out-patient peripheral blood stem cell (PBSC) donation. It is similar to donating platelets or plasma.

10% of donors are asked to provide blood stem cells collected from bone marrow. The blood stem cells are withdrawn from the donor's pelvic bone.

BE A HERO FOR JASON

Jason is a retired Air Force and Marine Corps veteran, who loves fishing with his boys and rooting for anything North Dakota sports. He is a hero among us all who has fought some of the toughest battles. In 2019, he was diagnosed with a blood cancer and is urgently searching for a blood stem cell transplant. Jason is now looking for his own hero to help cure his blood cancer. Please swab your cheeks to become a hero for Jason.
